Humate Treatments

High quality humates and humic acid products for healthy plants and soil. Humate materials are widely distributed organic carbon containing compounds found in soils, fresh water, and oceans. These substances are formed from the biological and chemical

breakdown of animal and plant life, and make up approximately 75 percent of the organic matter that exists.

Hazardous Tree Evaluation

There are several causes of a hazardous tree, take a look at some of the reasons that can cause a hazardous tree. A tree is consider hazardous when it has a structural defect or the tree is located to close to property structure. Hazardous property structured areas are where personal.

Tree Planting

Planting trees is an easy and effective way to beautify your property and landscape, provide shade in spring and summer and wind protection in winter and enhance privacy all while increasing real estate values at the same time. Since a tree is such a visible part of the landscape, care must be taken to ensure proper growth conditions are maintained. A tree is far more difficult and expensive to replace, once mature in the landscape, than most shrubs. However, with some advance planning, trees too can be easily maintained.

Tree Growth Regulation

Depending on your jurisdiction there are currently regulations in place for trees, sidewalks and fences. Our certified arborist will evaluate your property to ensure all regulations are being met to avoid costly fines, damage to your property, or personal injury. Tree growth regulation is important to the health of your tree population along with yearly.
